

ReactViewController.swift

```
class ReactViewController {  
  
    override open func viewDidLoad() {  
        super.viewDidLoad()  
  
        reactView.initializeReactView(  
            componentName: componentName,  
            props: propsWithReference()  
        )  
    }  
}
```

```
SQS_CALLBACK_METHOD(  
    doSomething:(nonnull NSString *)reference  
    data:(nonnull NSString *)data,  
    MyNativeWrapper,  
    @selector(doSomething:), (@[data])  
);
```
