

# MyComponentManager.swift

```
@objc public final func doSomething(  
    reference: String,  
    data: String) {  
  
    let myView = referenceMap[reference]  
    myView.doSomething(data)  
}
```

# MyComponent.swift

```
public final func doSomething(  
    data: String) {  
  
    print("hello \(data)")  
}
```
