

ReactViewController.swift

```
class ReactViewController {  
  
    private func propsWithReference() ->  
        [String: AnyObject]  
    {  
        var viewProps = props()  
        viewProps["reference"] =  
            ObjectReference.reference(forObject: self)  
        return viewProps  
    }  
}
```

ReactViewController.swift

```
class ReactViewController {  
  
    override open func viewDidLoad() {  
        super.viewDidLoad()  
  
        reactView.initializeReactView(  
            componentName: componentName,  
            props: propsWithReference()  
        )  
    }  
}
```
