ReactViewController.swift

```
class ReactViewController {
  private func propsWithReference() ->
    [String: AnyObject]
    var viewProps = props()
    viewProps["reference"] =
      ObjectReference.reference(forObject: self)
    return viewProps
```

ReactViewController.swift

```
class ReactViewController {
  override open func viewDidLoad() {
    super.viewDidLoad()

    reactView.initializeReactView(
        componentName: componentName,
        props: propsWithReference())
}
```
