# ./web/TelnumInput.js

```javascript
class TelnumInput extends Component {
  render() {
    const formattedValue =
      this.format(this.props.value);

    return (
      <StringField
        {...props}
        className={className}
        htmlAttributes={htmlAttributes}
        type="tel"
        label={label}
        placeholder={placeholder}
        value={formattedValue}
      />
    );
  }
}
```

US formatting (default)

</>

This is the basic usage of the 'TelephoneField' field
